

Pergola

Put cover over patio. It will connect to existing wood fence. It's open on the other side. The side you see is existing wood fence. There will be a foot to 2 foot of screen at top that connect to wood fence to top of rafters. so it will go from side you see, ^{and} back. The other side is open. It's not connected to roof. It gets close but doesn't connect.

The post there will be 4 post. To make it secure there will be a bolt to post to brick.

P.S.

The screen is to keep debris out. The winds are fierce, it's like straight line winds. In this area.
