RE: 1010 S Main St (Power Line)

Dear Mr. McDaniel:

Per your request, City Water and Light (CWL) has inspected and evaluated the power line along Church St at the site of the new Jonesboro Orthopedics & Sports Medicine on 1010 S Main St. CWL would like to present the following considerations to support not relocating the power line in this area:

- The power poles were replaced in 2017 as part of CWL's ongoing efforts to improve the electric system infrastructure and proactively address maintenance issues. Considerable effort and resources were required for the replacement of this line along Church St.
- Due to the primary and secondary feeds served off of this line, as well as the street alignment and property constraints, the design of the power line was challenging and required multiple anchors. Realignment would certainly introduce significant additional challenges and most likely introduce multiple additional anchors in this downtown corridor.
- Further, relocating the power line along this property could very well create problems for adjacent properties.

Thank you for your consideration of these issues. CWL respectfully requests that the power line remain in its current location. CWL strives to partner with developments and improvements within the City of Jonesboro and appreciates the opportunity to present the concerns at this particular site. If you have any questions, please contact my office at (870) 930-3321.

Sincerely,

Susan Merideth, P.E.  
Engineering Services Director  
City Water & Light Jonesboro
