

We are requesting this conditional use permit for the purpose of replacing the churches current sign with a Watchfire LED message center. We are planning to make the requested changes with the intention of attracting more church members while informing current church members with the signs content. (To scale rendering attached to file)

By changing out the current changeable letter board to an LED message center this will be very beneficial to the church and its mission. With the position of the sign and the actual church building, the residential properties in question would have obstructed or no view whatsoever of the sign. We ask that you approve this small project without prejudice. Thank you
