

The standard that is expected of the MAPC has NOT been met with the rezoning request RZ 20-09

The agenda for this meeting today was posted on legistar, the City's legal site since Friday, July 3rd

As of 5:25 pm today there is incorrect information on the Staff Summary attachment. And the 7 USPS Receipts that are shown on the attachments, there are NO names or addresses listed. Whether you're for it or against it, this information is very beneficial. The attached is of the previous rezoning that we just talked about with the ATV's. It's incorrect information.

I don't know how you all you, the committee members get your information. But it's incorrect information and how can you make a proper decision on this rezoning request tonight?

All of you are chosen to make a proper decision to forward or not forward onto City Council next week.

The concerned citizens of Jonesboro with many of them I have talked to ALSO have not been able to study the proper information concerning this rezoning request. So we weren't able to have the proper information of whether you're for it or against this rezoning.

It would be biased to the developer and TOTALLY irresponsible if you voted to forward this request to Council with all of us knowing that you HAVEN'T taken the time to look at it OR study it enough to make the proper decision. It would be very UNPROFESSIONAL if you did!

Considering all the standards haven't been met, there is ONLY ONE right decision you can reach for the citizens that you represent and work for. I ask that you table this rezoning request until July 28, the next MAPC meeting so the citizens can have the proper time to decide.

Again, I have ALWAYS found that the STAFF SUMMARY has provided a lot of good information whether you're for or against the rezoning.
