Re: RZ-13-07 Huff PDD

The Jonesboro Engineering Department and the Jonesboro MPO have been working together to develop an Access Management Policy for Jonesboro, to help alleviate and prevent congestion on major roadways, such as we now experience on Stadium, Caraway, Highland, and Johnson. Until the policy is adopted, MPO review of site plans is intended to provide a second set of eyes on potential traffic problems.

Southwest Drive is another critical arterial road in need of protection. The proposed site plan for a planned development district on Southwest Drive only shows one point of ingress/egress for the development. A separate connection to future or planned roadways should be provided.
