The Current/Future Land Use Map recommends this location as a **High Intensity** Growth Sector.

A wide range of land uses is appropriate in the high intensity zone, from multi-family to fast food to Class A office space to outdoor display/highway oriented businesses like automotive dealerships, because they will be located in areas where sewer service is readily available and transportation facilities are equipped to handle the traffic.

- Fast Food Restaurants

Master Street Plan/Transportation

The subject property will be served by E. Nettleton Ave. and Access Rd. The Master Street Plan classifies E. Nettleton Ave. as a Minor Arterial and Access Rd. as a local street.

Minor Arterials function similarly to principal arterials, but operate under lower traffic volumes, serve trips of shorter distances, and provide a higher degree of property access than principal arterials.

FUNCTION: Minor Arterials provide the connections to and through an urban area. Their primary function is to provide short distance travel within the urbanized area. Since a Minor Arterial is a high volume road, a minimum of 4 travel lanes is required. At intersections with Collector Streets or other Arterials (principal or minor), additional right-of-way may be required if the anticipated turning movements warrant extra lanes.

DESIGN: Cross-section selection shall be based on anticipated traffic volume and speed limit, or traffic impact analysis, if applicable. Design in accordance with AASHTO policy on Geometric design of highways and streets (current edition).

MINOR ARTERIAL STREET OPTION 2

MINOR ARTERIAL STREET OPTION 3

Local Streets serve the lowest traffic volumes. Low traffic volumes combined with slow travel speeds help to create a good residential setting. New developments should be reviewed to avoid creating cut-through streets that become commuter routes that generally lower quality of life for residents.

FUNCTION: The Local Street function is to provide access to adjacent property. The movement of traffic is a secondary purpose. The use of a Local Street in a residential area by heavy trucks and buses should be minimized.

DESIGN: Local Street Option 1 is to be used when on-street parking is provided within the development. Option 2 is to be used when on-street parking is not provided within the development. Option 3 is to be used in commercial mixed use areas.

Approval Criteria- Chapter 117 - Amendments:

The criteria for approval of a rezoning are set out below. Not all of the criteria must be given equal consideration by the MAPC or City Council in reaching a decision. The criteria to be considered shall include, but not be limited to the following.

Criteria	Explanations and Findings	Comply Y/N
(a) Consistency of the proposal with the Comprehensive Plan/Land Use Map	The proposed district rezoning is consistent with the Adopted Land Use Plan. The property is located in the high intensity growth sector.	
(b) Consistency of the proposal with the purpose of Chapter 117-Zoning.	The proposal will achieve consistency with the purpose of Chapter 117, with compliance of all District standards.	
(c) Compatibility of the proposal with the zoning, uses and character of the surrounding area.	Compatibility is achieved with this rezoning considering the surrounding area includes commercial zonings and uses.	
(d) Suitability of the subject property for the uses to which it has been restricted without the proposed zoning map amendment;	Without the proposed zoning map amendment, this property cannot develop as a commercial use.	
(e) Extent to which approval of the proposed rezoning will detrimentally affect nearby property including, but not limited to, any impact on property value, traffic, drainage, visual, odor, noise, light, vibration, hours of use/operation and any restriction to the normal and customary use of the affected property;	With proper planning there should not be any adverse effects caused by the property.	
(f) Impact of the proposed development on community facilities and services, including those related to utilities, streets, drainage, parks, open space, fire, police, and emergency medical services	Minimal impact if rezoned due to the fact that the area is already equipped to handle commercial and other high intensity uses.	

Staff Findings:

Applicant's Purpose

The proposed area is currently classified as "R-1" single family medium density district. The applicant is applying for a rezoning to allow commercial uses at this location.

Rezoning this property is consistent with the *Jonesboro Comprehensive Plan* and the *Future Land Use Plan*.

Chapter 117 of the City Code of Ordinances/Zoning defines C-3 as follows:

C-3, general commercial district. The purpose of this district is to provide appropriate locations for commercial and retail uses which are convenient and serve the needs of the traveling public. The district also provides locations for limited amounts of merchandise, equipment and material being offered for retail sale that are more suitable for storage and display outside the confines of an enclosed structure. Appropriate locations for this district are along heavily traveled arterial street. Development of groupings of facilities shall be encouraged, as opposed to less desirable strip commercial.
