*Street  
Closing  
School  
Street*

July 31, 1980

Netteton Baptist Church  
Mr. James A. Blalock  
Chairman, Board of Trustees  
Jonesboro, Arkansas 72401

Dear Mr. Blalock:

It is my understanding that the purpose of closing a portion of School Street is to allow the Church to build closer to the street.

If your plans call for the building to be built within 30 feet of our 4" gas main, which is under asphalt or concrete, then we are required to encase the gas main with a vent at each end. However, if this line is not under asphalt or concrete there will be no need for casing.

Since this gas main serves all of Nettleton, the casing of the main would be much less expensive to the Church than the relocation of the main.

At today's rates it would cost the Church about \$12.00 per foot for the main and casing.

Sincerely,

*Albert E. Qualls*  
Albert E. Qualls  
District Manager
