

To whom it may concern,

I am requesting approval to have a shop building erected on a concrete slab located on my property at 3701 Casey Springs rd. and is located west and north of my house on a vacant lot. The slab was poured approximately 25 years ago for the purpose of a basketball court for my sons with the intent of building a work shop on it after they were grown, at that time we were not in the city limits.

The purposed building would be professionally installed by Overman Buildings from Pocahontas and the colors would match my house as close as possible. I have written permission from the adjoining land owners and I am asking that you approve my request.

Thank you,

Michael Craig
