RE: Letter about Rezoning

To All,

Please overlook our misprints. **The application is the more accurate document to review.** The request in the application is actually for an RM-12 classification. That is almost exactly the allowed density of the former R-2 ($43,560 \div 3,600 = 12.1$ units per acre) classification. This tract is currently zoned C-3, but is surrounded on all sides by the existing R-2 classifications.

Thank you,
G. Hamman
