 Asbestos Survey Proposal #P06-031

February 1, 2006

## Scope of Work

The purpose of the proposed Asbestos/IAQ Survey will be to clearly identify, sample, analyze and document suspect asbestos-containing materials (ACM) and current or past materials that may be affected by microbial constituents within the building. In addition, a detailed report stating the findings and results obtained by EEG will be provided.

Specifically, the Scope of Work for the Asbestos Survey will entail:

- ◆ Building survey work and suspect material inspection
- ◆ Collection and analysis of up to 36 samples of suspect ACM. If additional samples are required, they will be collected and analyzed for an additional fee of \$10 per sample, per layer. The exact number of samples collected will be determined at the time of the survey. EEG will collect samples of roofing materials (roof flashing, built-up roof, etc.). Owner is responsible for repairing any coring holes (approximately 2" in diameter) in the roofing system upon completion of sampling.
- ◆ Collection and analysis of an estimated five (5) microbial samples to include two wall check air samples, two spore trap air samples, and one surface sample.
- ◆ Development of an inspection report stating the findings of the survey. The final detailed report will summarize sampling locations, results, and approximate quantities of effected building materials.

## Fee Schedule

<b>Project Initiation Fee</b>	<b>\$250.00</b>
<i>Freight, Mileage, Consumables</i>	
<b>Field Services</b>	<b>\$750.00</b>
<i>On-Site Investigation Conducted by Certified Asbestos Inspector</i>	
<b>Analytical Services</b>	<b>\$360.00</b>
<i>Estimate 36 Samples at \$10.00 per Sample per Layer</i>	
<i>Additional Samples will be Billed at \$10.00 per Sample per Layer</i>	
<i>Exact Number of Samples to be Determined at Time of Site Visit</i>	
<i>Analytical Price Quote is Based on a Normal Turnaround Time of 5-7 Days</i>	
<i>Estimate 5 Microbial Samples:</i>	<b>\$325.00</b>
<i>Two Wall Check Air Samples</i>	
<i>Two Spore Trap Air Samples</i>	
<i>One Surface Sample</i>	
<b>Report Generation</b>	<b>\$365.00</b>
<b>TOTAL ESTIMATED PROJECT COST</b>	<b>\$2,050.00</b>

## Proposal Acceptance
