This item was Filed.

COM-15:046

Mosquito Control report for June, 2015

Attachments: [June Mosquito Report](#)

Councilman Vance noted the city has been experiencing a bad mosquito problem lately. He added he thinks Vector is trying, but they may need to try harder to get the problem under control. Chairman Johnson explained the recent wet weather probably made the problem worse and the company may have gotten behind. Councilman

Moore asked how many times Vector has flown over the city. Chairman Johnson and Councilman Vance both stated they only know of the company flying over the city twice so far this year. Further discussion was held concerning the mosquito issue. Councilman Moore suggested the city may have to look at paying for additional flights over the city. He noted last year when the city paid for more flyovers, he didn't think it cost that much. Chairman Johnson agreed. He also suggested having Jim Stark from Vector at the next meeting to give an update.

Councilman Moore explained he would be in favor of the city being sprayed every week between the flood stage and the harvest stage. Chairman Johnson noted they discussed doing that last year. Councilman Moore also noted the city may want to consider those options during the budget time.

This item was Filed.

A RESOLUTION OF THE CITY OF JONESBORO, ARKANSAS AUTHORIZING THE MAYOR TO ENTER INTO AN AMENDED AGREEMENT WITH VECTOR DISEASE CONTROL INTERNATIONAL, LLC

WHEREAS, the City of Jonesboro, Arkansas and Vector Disease Control International, LLC entered into a contract for mosquito control services on or about January 3, 2012; and

WHEREAS, the parties wish to amend the Agreement to provide for eight (8) aerial applications rather than the original agreement of five (5) aerial applications and said increase will not result in any increased cost to the City of Jonesboro; and

WHEREAS, said agreement is attached hereto and the terms set out therein;

NOW THEREFORE BE IT RESOLVED BY THE CITY COUNCIL FOR THE CITY OF JONESBORO, ARKANSAS THAT:

1. The City of Jonesboro approves the Amended Agreement with Vector Disease Control International, LLC to perform mosquito control services for the City of Jonesboro. The Amended Agreement, including the scope of services to be provided, are set out in the attachment.
2. The Mayor, Harold Perrin and City Clerk, Donna Jackson are hereby authorized by the City Council for the City of Jonesboro to execute all documents necessary to effectuate this agreement.

**MOSQUITO CONTROL
PROFESSIONAL SERVICES AGREEMENT**

THIS AGREEMENT for Mosquito Control Professional Services is entered into between the City of Jonesboro, Arkansas (the City) and Vector Disease Control International, LLC (Vector). For the protection of its residents, the City desires to provide a professionally designed and integrated program for the control of the mosquito population in the City. Vector has agreed to provide these services subject to the terms and conditions of this Agreement.

NOW, THEREFORE, in consideration of the mutual covenants, agreements, and Considerations contained herein, the City and Vector agree as follows:

1. **Term of the Agreement**. The term of this Agreement shall be for a period beginning January 1, 2012 and ending December 31, 2012. Provided, however, that this Agreement shall be automatically renewed each calendar year for the next year, for a maximum of six (6) years beginning on January 1 and ending on December 31 of each year with the conditions as contained in this Agreement unless terminated by either party as set out herein.

The City may choose not to renew this Agreement as required in this paragraph if (a) Vector fails to perform its obligations to the City as required under the terms of this Agreement or (b) the City becomes unable to meet its financial obligations in the ordinary course of its business. Vector may choose not to renew only if (a) renewal would result in extreme financial hardship to Vector or (b) Vector ceases to exist as a corporate entity.

Non-renewal will be invalid and ineffective unless the non-renewing party provides the other party with written notice of its intention not to renew not later than January 1 of any subsequent year in which automatic renewal occurs. Such notice must contain the reasons for non-renewal.

2. **Services to be Provided.** During the primary and renewal terms of this Agreement, Vector shall provide the following services during the mosquito breeding season (anticipated to be April 15 to October 15):
- a) **Surveillance.** Larvae breeding sites such as ditches, tire piles, artificial containers, septic ponds, rainwater pools, etc. will be inspected regularly and periodically. In addition, adult mosquito populations will be monitored using light traps, gravid traps, and landing rates. All collections will be identified as to specie and population distribution. Density will be plotted to detect any changes in problem areas.
 - b) **Larviciding.** Vector will apply only EPA-registered chemical and biological larvicides throughout the City and associated buffer zone. These will be applied at least weekly to persistent mosquito production areas and as indicated in other production areas. Chemicals, application rates and methods, including aerial applications if needed, will be tailored to habitat and mosquito specie in order to provide greater control.
 - c) **Adulticiding.** Vector will apply only EPA-registered mosquito adulticides which will be dispensed either by aerial application (minimum of (8)eight per year) or from truck-mounted, ultra-low volume (ULV) equipment throughout the City and associated buffer zone in order to provide uniform control and protect against re-infestation. Every attempt will be made to fly these missions in 8 consecutive weeks beginning when mosquito populations warrant. Ultimately, timing of these spray missions will be at Vector's discretion depending on mosquito surveillance data, thereby allowing

Vector to schedule around unpredictable weather and mosquito hatch offs. This will mean better efficacy and control for residents.

All ULV applications will be timed to coincide with peak mosquito activity in order to provide the most effective control possible.

- d) **Record Keeping**. Vector will keep complete records of all operations including records of inspections and larvicide and adulticide applications, of all which will be tabulated and presented in written monthly reports to the City. All forms and reports of pesticide usage required by all regulatory agencies will be filed to comply with applicable laws and copies will be submitted to the City for its files.

3. **Payment**. For services to be provided by Vector during the term hereof, the City shall pay to Vector the following:

- a) For the primary term (2012) the sum of FOUR HUNDRED SIX THOUSAND DOLLARS (\$406,000.00) in twelve (12) equal monthly installments of \$33,833.33 each, payable on or before the 15th day of each month, beginning January 15, 2012.
- b) For the year 2013, the sum of FOUR HUNDRED TWELVE THOUSAND DOLLARS (\$412,000.00) in twelve (12) equal monthly installments of \$34,333.33 each, payable on or before the 15th day of each month, beginning January 15, 2013.
- c) For the year 2014, the sum of FOUR HUNDRED EIGHTEEN THOUSAND DOLLARS (\$418,000.00) in twelve (12) equal monthly installments of \$34,833.33
- d) For the year 2015, the sum of FOUR HUNDRED TWENTY-FOUR THOUSAND DOLLARS (424,000.00) in twelve (12) equal monthly installments of \$35,333.33 each, payable on or before the 15th day of each month, beginning January 15, 2015.

e) For the years 2016, 2017, and 2018, the sum of FOUR HUNDRED THIRTY THOUSAND DOLLARS (\$430,000.00) in twelve (12) equal monthly installments of \$35,833.33 each, payable on or before the 15th day of each month, beginning January 15, 2016.

4. **Insurance.** Vector shall at its own expense procure and maintain the following coverages:

- a) Workers compensation with a statutory minimum employer liability;
- b) General liability with a minimum general aggregate limit of \$2,000,000.00.
- c) Commercial Auto with a minimum liability of \$1,000,000.00.
- d) Aviation liability with a minimum of \$1,000,000.00.

Vector shall provide the City with written proof that it has obtained the insurance required under the terms of this Agreement.

5. **Non-Liability of the City, Its Officials, and Employees.** No employee or elected official of the City shall be personally responsible for any damage resulting from the negligence or intentional acts of Vector in the performance of services required under the terms of this Agreement.

6. **Indemnity.** Vector shall indemnify and hold harmless the City, its elected officials, agents, and employees from and against any and all suits, actions, legal proceedings, claims, demands, damages, costs, expenses, and attorneys' fees as a result of any work done by Vector in the performance of this Agreement, including full and complete compliance with all State and Federal laws, rules, and regulations.

7. **Defaults.** A material breach of any of the terms and conditions of this Agreement on the part of Vector shall be grounds for the termination of this Agreement at the option of the

City. The City, upon termination, shall be at liberty to re-let the work to other parties, or to perform the work without contract, and in either case, Vector shall be liable for any excess costs in performing such work over the cost to the City if Vector had continued to perform in accordance with this Agreement.

8. **Civil Unrest.** Notwithstanding anything contained in this Agreement to the contrary, in the event Vector, in its sole discretion, determines that because of civil unrest a substantial risk of personal injury to its employees or damage to its equipment exists, then Vector may refuse to provide services in that part of the coverage area where such risk exists until:

- a) Order is restored and the threat of such injury or damage has been resolved; or
- b) The City has, in the sole discretion of Vector, taken adequate security measures to insure the safety of Vector personnel and equipment.

any refusal by Vector to treat a part of the coverage area under the circumstances described in this section shall not be deemed to be a breach of this Agreement.

9. **Prohibition of Other Commercial Mosquito Control Applications.** Because of its various reporting and record keeping responsibilities and the liability assumed by Vector under the terms of this Agreement, and because of potential harm to the public, the City shall not permit other commercial mosquito control pesticide applications to occur in public areas of the City during the term of this Agreement.

10. **Miscellaneous.** That the parties are agreed that Vector shall maintain their principal office for the Northeast Arkansas region in Jonesboro, Arkansas. Said office shall be staffed and operated as the central shipping and receiving point for Northeast Arkansas, with bulk chemical storage, computer system, and reports conducted from said office. It is the further understanding and intention of all parties that this contract shall be contingent upon being in compliance with all applicable laws of the State of Arkansas.

IN WITNESS WHEREOF, the parties have entered into this Agreement on the
_____ day of September, 2015.

City of Jonesboro Activity Report

July 2015

Vector Disease Control, Inc. (VDCI) provides a proven, scientific approach to mosquito control for the city of Jonesboro. VDCI's operations include larval and adult mosquito surveillance followed by the application of larvicides and adulticides. In addition, our office responds to service requests from the public.

Mosquito Surveillance

VDCI has utilized a total of thirteen (13) New Jersey light traps placed in residential and recreational areas throughout Jonesboro during this reporting period. These traps collected an average of 31.4 mosquitoes per trap night (2,043 total mosquitoes) during this time. There have been a total of 2 mosquito species collected, with *Anopheles quadrimaculatus* being the most predominant species.

Larval Control Activity

Permanent water, flood water, artificial containers, and drainage system sites are inspected for larval mosquito breeding on a regular basis. In total, 8 site inspections found 0 sites with no presence of mosquito larvae. As a result of these inspections no Granular BTI Aquabac 200G was applied to these mosquito breeding sites. Additionally, VDCI is continuing to eliminate breeding habitats for artificial container mosquitoes by targeting bird baths, buckets, tires, etc.

*Report***ADULT MOSQUITO CONTROL ACTIVITY**

In response to community events and mosquito surveillance data, VDCI applied adulticide (23) truck night for this reporting period. All adulticide ULV applications were made with truck-mounted ULV units equipped with GPS-enabled monitors. During this report period, a total of 7,248.9 spray miles (57,703.3 acres) were treated with a total of 531.2 gallons of adulticide in residential and recreational areas. In addition to routine truck spraying, VDCI has responded to 181 service request and adulticided all parks and special events during this month.

Summary

During this reporting period, VDCI has continued to provide exceptional control of larval and adult mosquito populations. VDCI will remain diligent in our surveillance and control activities to prevent a significant increase in the mosquito population. Based on recent weather conditions VDCI expects the trend of routine adulticiding and larviciding to continue. However, if VDCI detects a significant rise in the mosquito population we will increase larval and adult control. As always, VDCI welcomes residents with any mosquito-related questions or concerns to contact VDCI's Jonesboro office directly at 870.933.6939.

City of Jonesboro Activity Report

August 2015

Vector Disease Control, Inc. (VDCI) provides a proven, scientific approach to mosquito control for the city of Jonesboro. VDCI's operations include larval and adult mosquito surveillance followed by the application of larvicides and adulticides. In addition, our office responds to service requests from the public.

Mosquito Surveillance

VDCI has utilized a total of thirteen (13) New Jersey light traps placed in residential and recreational areas throughout Jonesboro during this reporting period. These traps collected an average of 31.7 mosquitoes per trap night (1,236 total mosquitoes) during this time. There have been a total of 3 mosquito species collected, with *Anopheles quadrimaculatus* being the most predominant species.

Larval Control Activity

Permanent water, flood water, artificial containers, and drainage system sites are inspected for larval mosquito breeding on a regular basis. In total, 53 site inspections found the presence of mosquito larvae. As a result of these inspections 76.0 ounces of the larvicide Aquabac 200G was applied to these mosquito breeding sites. Additionally, VDCI is continuing to eliminate breeding habitats for artificial container mosquitoes by targeting bird baths, buckets, tires, etc.

*Report***ADULT MOSQUITO CONTROL ACTIVITY**

In response to community events and mosquito surveillance data, VDCI applied adulticide (17) truck night for this reporting period. All adulticide ULV applications were made with truck-mounted ULV units equipped with GPS-enabled monitors. During this report period, a total of 1,040.2 spray miles (36,482.7 acres) were treated with a total of 238.9 gallons of adulticide in residential and recreational areas. In addition to routine truck spraying, VDCI has responded to 39 service request and adulticided all parks and special events during this month.

Summary

During this reporting period, VDCI has continued to provide exceptional control of larval and adult mosquito populations. VDCI will remain diligent in our surveillance and control activities to prevent a significant increase in the mosquito population. Based on recent weather conditions VDCI expects the trend of routine adulticiding and larviciding to continue. However, if VDCI detects a significant rise in the mosquito population we will increase larval and adult control. As always, VDCI welcomes residents with any mosquito-related questions or concerns to contact VDCI's Jonesboro office directly at 870.933.6939.

City of Jonesboro Activity Report

September/October 2015

Vector Disease Control, Inc. (VDCI) provides a proven, scientific approach to mosquito control for the city of Jonesboro. VDCI's operations include larval and adult mosquito surveillance followed by the application of larvicides and adulticides. In addition, our office responds to service requests from the public.

Mosquito Surveillance

VDCI has utilized a total of (13) New Jersey light traps placed in residential and recreational areas throughout Jonesboro during this reporting period. These traps collected an average of 21.8 mosquitoes per trap night (1,415 total mosquitoes) during this time. There have been a total of 3 mosquito species collected, with *Anopheles quadrimaculatus* being the most predominant species.

Larval Control Activity

Permanent water, flood water, artificial containers, and drainage system sites are inspected for larval mosquito breeding on a regular basis. In total, 34 site inspections found the presence of mosquito larvae. As a result of these inspections a total of 30.0 ounces of Aquabac 200G was applied to these mosquito breeding sites. Additionally, VDCI is continuing to eliminate breeding habitats for artificial container mosquitoes by targeting bird baths, buckets, tires, etc.

Adult Mosquito Control Activity

In response to community events and mosquito surveillance data, VDCI applied the adulticide Permanone 30-30 on 21 truck nights for this reporting period. All adulticide ULV applications were made with truck-mounted ULV units equipped with GPS-enabled monitors. During this report period, a total of 1,744.9 spray miles (19,484.4 acres) were treated with a total of 158.9 gallons of adulticide in residential and recreational areas. In addition to routine truck spraying, VDCI has responded to 13 service requests and adulticided for all parks and any special events, including softball and soccer tournaments, throughout the month.

Summary

During this reporting period, VDCI has continued to provide exceptional control of larval and adult mosquito populations. VDCI will remain diligent in our surveillance and control activities to prevent a significant increase in the mosquito population. Based on recent weather conditions VDCI expects the trend of routine adulticiding and larviciding to continue. However, if VDCI detects a significant rise in the mosquito population we will increase larval and adult control. As always, VDCI welcomes residents with any mosquito-related questions or concerns to contact VDCI's Jonesboro office directly at 870.933.6939.

We appreciate the opportunity to provide the abatement program for the city of Jonesboro and look forward to serving the city in the future.

*Report*

Year-end Totals: 2015

Adulticiding-

Total chemical sprayed: 1,335.2 gallons

Total nights sprayed: 159

Total miles treated: 6,724.0(actual miles)

Total acres treated: 159,157.5

Service Request Total: 323

Larviciding-

Total larvicide used: 216.8 ounces

Total inspection sites treated: 312

Light Trap Surveillance-

Total mosquitoes collected: 5,823

Total nightly average: 22.4

Total species collected: 4

Aerial

Total Gallons: 442.7

Total Acres: 78,029
