**8. Unfinished Business**

**9. Mayor's Reports**

**10. City Council Reports**

*Councilman Moore discussed a recent incident at The Grove Apartments. He noted the apartments have been open 90 days and the Police Department has been there 148 times. He stated they have to find some way for the Police Department to address repeated complaints to the same location. He added the City has spent upwards of \$50,000 to take care of the problems in that area, with three officers*

being injured in the process. Police Chief Michael Yates explained he has spoken with City Attorney Phillip Crego regarding a disorderly house ordinance and is desperately working to find a tool that will work in Arkansas regarding these issues. He noted there are laws regarding nuisance abatement, but it can be time consuming to push something like that through. Mr. Crego stated the first one took about twelve months, but he doesn't see that problem for the future. Chief Yates explained there has also been discussion of a managerial responsibility ordinance concerning how business is conducted. He stated he will be looking into that because a lot of responsibility is placed on management to control what goes on in the complexes. Councilman Moore asked for Chief Yates to have some idea of where they should proceed and present it at the next Public Safety meeting.

Councilman Johnson questioned the status of the new facilities for Streets and Sanitation. City Engineer Craig Light stated they have received a contract from the architect and are reviewing it. He added they hope to present it to the Council in December. He explained they also will be advertising for possible sites for the new facility. He noted it will take a year or two to get the facility built, but they are moving forward with the project. Councilman Johnson then questioned the problems with the septic system. Mr. Light stated the design person for the septic system is finishing up his plans and is getting the Health Department to approve them. He explained they found a storm drain hooked up to the sewer system that is causing it to fill up faster than needed, but the problem has been fixed. He stated they will continue to pump the system every other day if needed. Councilman Johnson explained he visited the site recently. He asked for someone to look at the black areas on the ceilings. He also expressed concern as to safety issues with the building settling. Mayor Formon asked Mr. Light to get someone to test the vents and for someone to check the building for structural problems.

Councilman Street stated Ms. Dorothy Rose from Arkansas Highway and Transportation Department made the final presentation concerning the Intelligent Transportation System architecture at the MPO meeting. He explained Jonesboro is required to have the ITS architecture in place due to Jonesboro's MSA status. He further explained the rough draft will be out in January and taken to the technical committee as well as the MPO policy committee for adoption in February. He stated it is needed for compliance for federal grants.

Councilman Street commended the Police Department for their work.
