To the Planning Committee members:

We the undersigned object to Fifty- Six apartments being built at the end of Arch Street. We all are concern about crowding the residential area, traffics concerns which already exist & crime.

Everyone uses Arch Street to exit on to Highway 18 /Highland. Long Street is not an exit .Arch; Henry & Irby Streets are all dead end streets with only one-way out which is by Arch Street exit. We have a problem with the trains that cross Highland backing up traffic several times of the day. The workforce form the industrial area is traveling on hwy 18 to Highland daily going to work & from work which makes it more difficult to come & go from the residential area now. The school buses run through these three dead end streets with the width of the streets barely <sup>30</sup>50 feet. This already dangerous for the school students & residents' living presently in the area must less, add additional cars & people for such a small area. The elderly mostly occupy these three streets with limited hearing & eye sight. This creates excessive concerns and more danger for the area such as accidents. The four way intersection across the railroad tracks is backed up all throughout the day & night time with cars on both sides of Highland & the railroad tracks. The area is a dangerous traffic concern without additional traffic added to the problem that exists. *we also have flooding & drainage problems*
