

Fence re-location project

Current location Caraway and Mathews (Future Transfer station)

Proposed location - Westside of Police Complex lot (1001 South Caraway)

Current fence is 8\ft tall, wood privacy, normally called flat solid fence. (See attached pictures)

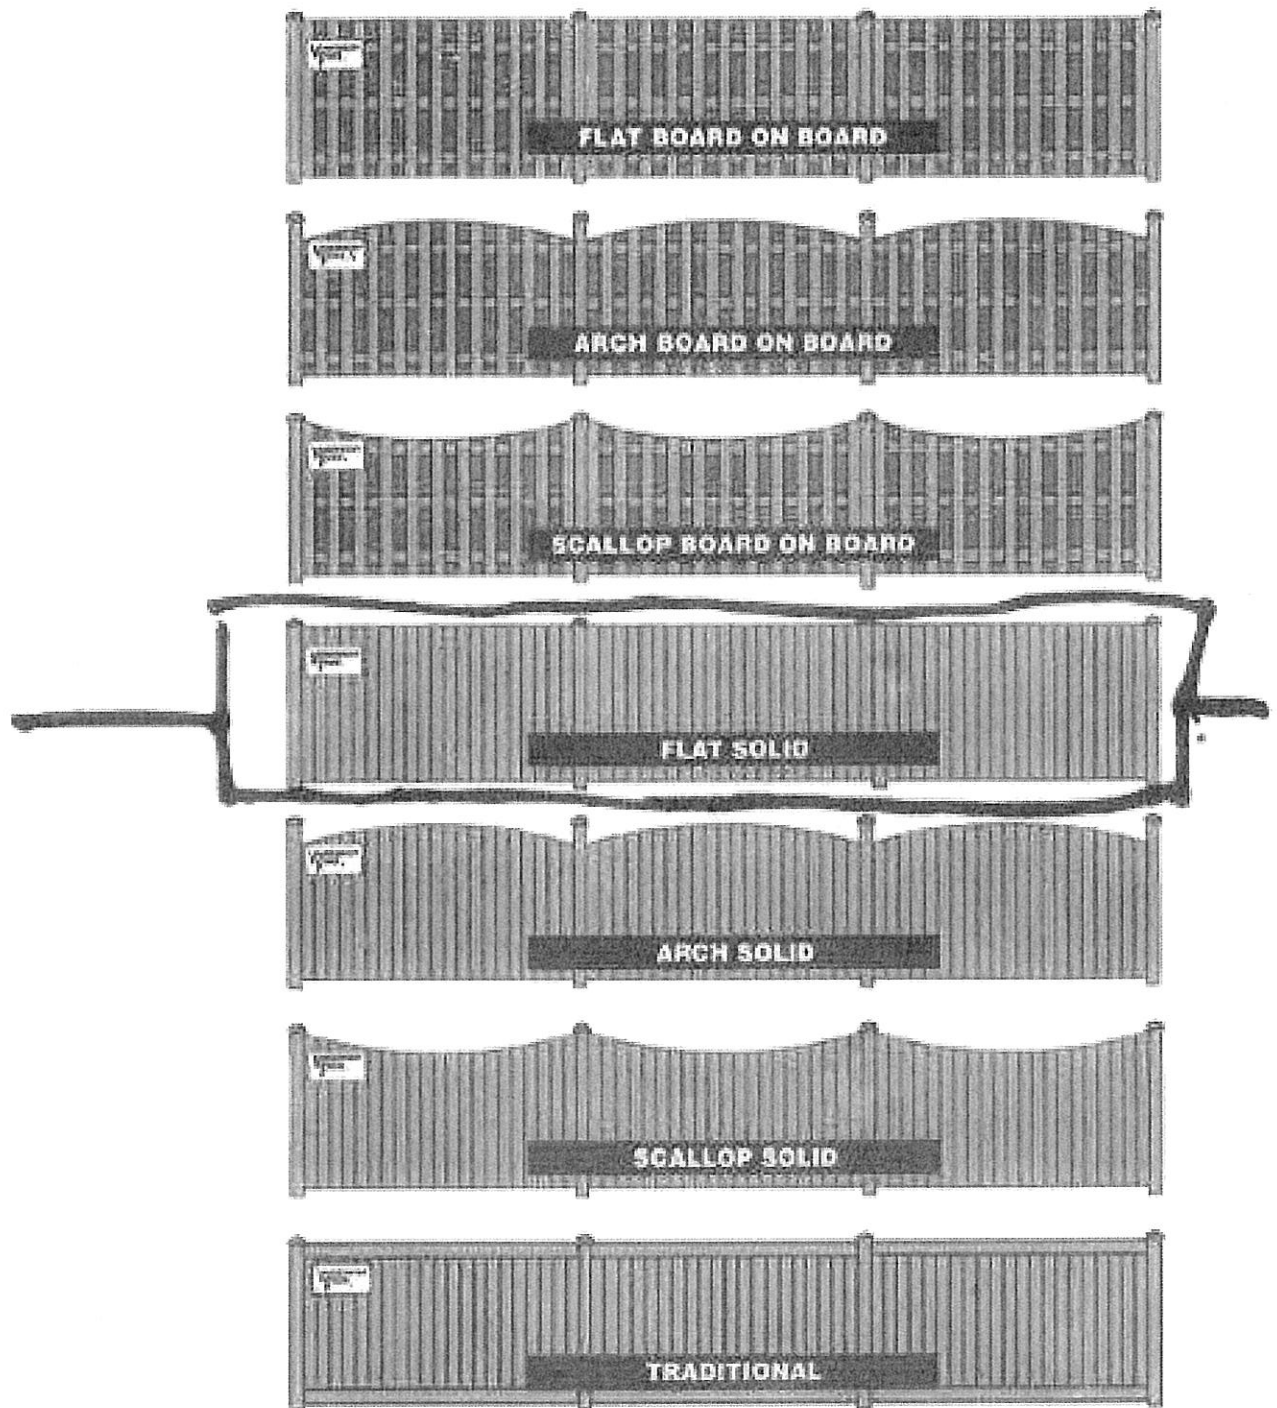

We have approximately 240 Linear Feet installed which needs to be removed or moved before Demolition of building.

Need 310 Linear Feet of privacy fence to give privacy between residential areas located west of the Police property.

We can move existing fence and install additional 70 LF.

The present 8 ft fence height requires a variance from planning. Otis Spriggs indicated it should not be a problem to get a variance.

If we chose to use a 6 ft fence the present 8 ft could be shortened.
