Mr. Claude Martin, P.E.
City Engineer, City of Jonesboro
4110 Lindberg Drive
P.O. Box 1845
Jonesboro, AR 72403RE: Debby Cossitt - Quality Homes
Site east of Stadium Boulevard, south of Higginbottom Creek
Our File Number 98111

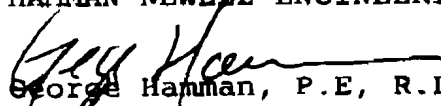

Dear Claude:

Following our meeting last week regarding the development of this site, the owner has requested that we confirm through your office the requirements imposed, and what information will be needed for a FEMA submittal. I realize that you have received this information second-hand through your contact at the U.S. Army Corps of Engineers, Mr. Mike Bowengasser^(sp?), who, in turn, received the information from FEMA.

We would like to confirm that the requirements were outlined as follows. We will be required to submit:

- 1) A "No Rise Certificate" accompanying a computer model of the creek with the proposed placement of the manufactured home inventory on the site;
- 2) The homes in inventory must be arranged parallel to the flow of Higginbottom Creek;
- 3) All the homes in inventory will have to be anchored at the tongue of the trailer; and
- 4) All stock-piled material present on the site will have to be removed as soon as possible.

If I missed something in our conversation, or if you have received any updated information, please contact our office as soon as possible so that we may make the appropriate arrangements to provide the required information. Otherwise, we are proceeding as outlined above. Thank you for your time and attention.

Respectfully,
HAMMAN NEWELL ENGINEERING
George Hamman, P.E., R.L.S.
