City Engineer Craig Light explained the City received two bids for this project and the bids were \$40,000 apart. He added this bid was within budget. He noted the price for the milling went down, but the price for asphalt went up. Mayor Perrin stated the City uses more of the milling than the asphalt.

Councilman Hargis asked if the City could use some of the materials allocated for this project on other projects. Mayor Perrin answered the City has contracts on certain projects, which is tied to the bid the City received. He added when the project amount exceeds the budgeted amount the City needs Council's permission to do anything else. Mr. Light explained the Street Department has additional funds to purchase asphalt for pothole patching, which is separate from this contract. He added this resolution is for the major roadwork that needs to be done. He noted the City budgeted \$500,000 for asphalt work and this project came in at \$460,000, which leaves extra funds that could be used for another street project.
