GRANICUS

Granicus Video

A complete video solution for government

Granicus Video enables organizations to build a content-rich library of live and archived public meeting webcasts and records without hassle, enabling agencies to reach a broader audience and further meet modern transparency demands.

With easy-to-use media management tools, agencies can schedule and broadcast live webcasts while simultaneously recording and archiving the live content to unlimited storage. Agendas can be imported prior to each meeting, allowing for video to be indexed in real-time, which eliminates hours of follow up work after an event has ended. After the meeting, publish a full and integrated public record which links the agenda directly to the video.

Empowered citizens can browse published agendas and supporting documents or save time by performing keyword searches to jump directly to specific topics, making it easier for viewers to find the information they're most interested in. Citizens can also subscribe to agendas or keyword searches to get real-time notifications when new, relevant content becomes available.

Opt in to HD video for an enhanced viewing experience or further enable accessibility and ensure ADA compliance by adding closed-captioning services. Agencies can monitor and analyze public interest through visitor and viewership reports, which break down visitor statistics, including most-popular content, number of views, length of time on site, and more to better understand the viewing audience.

Live event streaming

Archive videos with unlimited storage

Searchable, indexed content

Publish a complete public record

Closed captioning add-on for ADA compliance

Reports to analyze public participation
