Mr. Province offered a resolution as presented by a committee appointed to study the needed improvements to South Caraway Road recommending the City Council pass an ordinance establishing a Street Improvement District for the purpose of providing appropriate funding for the improvements of said road. Several residents spoke in opposition to the formation of said district noting an assessment would provide a financial hardship and they had previously given right of way and were promised by the county that a road would be paved under a state aid agreement. Mayor Brodell stated the state however, withdrew from the county contract after the area was annexed into the city on April 7, 1989. He further added the original request for the road came from officials of the Nettleton School District which is building a new elementary school at the intersection of Fox Meadow Lane and Caraway. The city agreed to assist in paying a proportionate cost if the property owners would also pay a portion and the city agreed to extend the paving from Arkansas 1-B to Arkansas 1 if right of way is dedicated by the property owners on the stretch of gravel road.

Mr. Strauser asked if the property owners were being assessed according to frontage foot. The proposal is based on improvements by frontage foot according to Kent Arnold, businessman supporting the project. Dr. Strauser

noted a different formula was utilized when the North Caraway Rd. Street Improvement District was formed whereby property owners living of N. Caraway but still benefitting from the project agreed to pay a portion of the cost. Mr. Arnold stated projections indicated property owners would pay \$4 per frontage foot for paving and private developers approximately \$100 to build a street. He further added 2.7 miles of land is involved with 2800 ft.

Mayor Brodell asked that the matter be further reviewed and the options discussed and brought back for consideration at the next meeting.
